#### 4. Sensory Integration Equipments/ Tools (Specification attached separately in Annexure-C)

| Sl. No. | Name of the Items / Instruments  | Estimated Quantity | Specification (Specified in Point No.) | Purpose  |
|---------|--|--------------------|--|--|
| 1       | Bolster swing  | 1                  | 1                                      | Vestibular Stimulation                               |
| 2       | Tyre tube swing  | 1 set              | 2                                      |  |
| 3       | T swing  | 1 set              | 3                                      |  |
| 4       | Lycra swing and hammocks   | 1 set              | 4                                      |  |
| 5       | Rope ladder swing  | 1 set              | 5                                      |  |
| 6       | Ball pool with multi colours small ball  | 1 set              | 6                                      | Tactile Stimulation                                  |
| 7       | Tunnel   | 1 set              | 7                                      |  |
| 8       | Bean bags  | 2                  | 8                                      |  |
| 9       | Wrapping in blankets, weighted blankets, towels  | 1 set              | 9                                      | For neutral warmth                                   |
| 10      | Sandwich activities: between mats, pillows, bean bags  | 1 set              | 10                                     | Tactile Stimulation                                  |
| 11      | Activities for Exploring: with sand, rice, beans and other textures  | 1 set              | 11                                     | Tactile textures                                     |
| 12      | Weighted Activities: weighted vest, ankle/wrist weights for ankle and wrist  | 1 set              | 12                                     | Tactile textures                                     |
| 13      | Scooter board  | 1 set              | 13                                     | Vestibular Stimulation                               |
| 14      | Balance Bean   | 1 set              | 14                                     | Vestibular Stimulation                               |
| 15      | Thera band   | 2                  | 15                                     | Vestibular Stimulation                               |
| 16      | Soft blanket   | 2                  | 16                                     | Tactile textures                                     |
| 17      | Soft mattress for completely covering the floor<br>Curtains  | 1                  | 17                                     | Tactile textures                                     |
| 18      | Sensory mats different textures (soft, rough)  | 1 set              | 18                                     | Tactile textures                                     |
| 19      | Blocks, bolsters, small chairs   | 1 set              | 19                                     | Vestibular Stimulation                               |
| 20      | Tactile brushes  | 1 set              | 20                                     | Tactile textures                                     |
| 21      | Playdoh, funny foam, textured balls, tactile walls, boards and books, textured puzzles, figure paints (regular , or using pudding), using various materials (satin, carpet swatches, silk, lambs wool, washcloths, cotton) and massagers, vibrating toys                             | 1 set              | 21                                     | Tactile Stimulation                                  |
| 22      | Chart paper, pencil, gum, crayon, gripper, eraser, scissor, note books   | 1 set              | 22                                     | Proprioceptors                                       |
| 23      | Form board (Alphabets, numbers, colours, shapes, body parts, size, flash cards (animals and fruits).   | 1 set              | 23                                     | Tactile textures                                     |
| 24      | Bids with lace, ring stand, button and UN button shirts, shoe lacing board, toys   | 1 set              | 24                                     | Tactile textures                                     |
| 25      | LED mirror ball, pin spot and mirror ball, mirror ball motor-mains, fire ball, sound activated light, Bubble tube (wiyh LED light and vibrator) and speakers connected to the sound player (pre recorded sound of water fall, wind chimes, birds sounds and soft instrumental music) | 1 set              | 25                                     | Visual stimulation                                   |
| 26      | <b>Toy Room</b><br>Wall mounted rack & Toys with different texture, colour for various age group (6 months - 18 years)   | 1 set              | 26                                     | for stimulation, special education and demonstration |

## Annexure- B

### 1. Activity Table

A colourful Play N Learn activity table for kids. Music and light function, and multiple functions like piano, flip the page activity, mirror fun, beat the drum, and spin switch. Multiple activities stimulate child's senses, physical development, and encourages learning and discovery.

### 2. Rowing

- The rowing machine should be operated by the patient of age group 3-9 years.
- It should be a multifunction type for building of strength of the children.
- It should be self propelled type for providing low or no impact on the patient.
- Provided with elastic rope with adjustable resistances of minimum 3.
- Its design should be play and colourful type to attract the children's.
- The item should have foam based padding to cover the steel frames for safe use of the children.
- Manufacturer should be ISO certified.

### 3-Parallel Bar

#### Technical Specification

- The parallel bar should be a height adjustable, platform based one which should be very simple for easy accommodation of multiple patients of age group 2-6years..
- The handrails should be in single piece, circular in design stainless steel pipe of minimum diameter 1 1/2".
- Both the end of the handrails should be fitted with bumpers.
- The Uprights should be made of heavy gauge square 1 1/2" steel tubest.
- All parts should be powder-coated.
- The uprights are to be fitted on a 1 1/2" thick hard plywood base. Both end of this platform should be UV curved for obstruction free. The platform should be stain finish. Both the end of the platform should have two anti slip threads for non skidding.
  
- Safety treads at both ends of platform should be provided for safety of the patient when take turn.
- Models make it safer for patient to turn

#### **Minimum dimension of the structure :**

- Length of the bar: 10feet
- Width of the bar: 25" – 28"
- Height adjustment of the Bar: 26" – 39"
- The manufacturer should be ISO 13485 approved.

### 4-Weight Cuff

- One pair of Wrist Weights for age group of 3-6 years.
- The Weight of Wrist Weight should be of 500gms-2 kg of adjustable weights.
- The weight should be covered in a soft, durable material.
- It should be completely latex free.
- It should be Easy and effective way to exercise the arms
- It should be Simple to fasten for total user comfort
- It should also be worn around the ankle
- Manufacturer should be ISO certified.

### **5-Multi propose Exercise Chair ( Weight and Puller Exerciser)**

Should be Specifically designed chair for multi exercise facility.

The unit should be used for the age group of 6-18 years.

Made of tubular steel constructed chair of 100 cm long x 65 cm wide approximate.

The chair should be fitted with overhead bar that extends out 80cm from the frame.

The chair with two stabilizing straps, three handles two foot straps, ropes with pulleys and overhead pulley system can be used for variety of exercises involving Reciprocal Motion for Elbow, Shoulder, Knees and Hips; Active Quadriceps and Hamstrings Stretching; Resistive and Assistive exercises.

A set of Ten locking weights should be provided for graded resistance for all exercises

The unit should not have any sharp edges.

The manufacturer should be ISO certified

#### **6- Ankle exerciser**

- It should be useful for the ankle exercise for the age group of 6-18 years who has injury and/or weakened ankles.
- Design with a painted aluminium boot with strap.
- The boot should be mounted on a laminated stainless steel sheet bracket having two springs for ankle.
- The resistance can be increased further by tightening spring's nut.
- Degree of flexion can be measured and recorded.
- Manufacturer Should be ISO certified

#### **7-Shoulder Wheel**

- It should be a wall mounted one.
- The wheel for use of age group 6-18 years.
- The motion arc can be adjustable from 10 to 38 inches by adjusting the handle.
- The wheel shall be mounted on a two chrome plated height adjustable (8" to 26") rails.
- The resistance can be varied by turning the resistance knob.
- The manufacturer should be ISO certified

#### **8-Fore- Arm Exerciser**

- Adjustable Hand Grip Exerciser shall be Ideal for early stages of rehabilitation
- The fore Arm Exerciser for use of age group 5-18 years
- It should be ideal for hand, finger, wrist or arm exercises
- The tension can be increased or decreased as per the user turning the adjustment knob.
- The tension range can be set at any level between 0.5kg-5kg allowing the tension to be steadily increased as the user regains strength.

## 10-PEDIATRIC TREADMILL

The Paediatric Treadmill should be used from the age of 4 years and up to 12 years old. Specialize application for rehabilitation and longitudinal testing of young children with chronic diseases.

### Specifications

- The treadmill should includes control unit of inbuilt programmable protocols.
- Elevation: 0 to 25 %
- Rehab speed: 0.1 to 12 km/h.
- start speed 0 km/h
- Standard running surface: 120 x 50 cm
- Standard pre-programmed protocols: Bruce & Balke
- Maximum patient weight: 100 kg
- Emergency stop: with magnetic lanyard
- Low noise level
- No belt-greasing required
- Soft surface
- Operates on 220 volt

### 11-Tilt table

- It should function like a motorized table with vertical to horizontal tilt is achieved with an easy-to-turn by crank mechanism.
- Crank is angled to provide leverage for maximum lifting efficiency.
- The table should have three positioning straps for security on raising the patient.
- Latex free
- Should have minimum 30" wide surface with an extra-wide footboard (20"W x 18"D),
- Minimum 2"-thick high-density (40) foam/Moulded foam padding.
- Made of heavy-duty steel frame with vinyl upholstery.
- . Surface area: 28"W x 78"L x 33"H. approximate
- The manufacturer should be ISO certified

### 12. Multy Gym

- Multiple Exerciser multi gym system for fitness as well as therapy.
- It should have facility for exercises for Chest Extension, High Pull, Low Pull, Rowing, Peck-Deck, Leg Extension Etc
- Easy To Use, Space Saving, No-Cable-Change Design
- The frame work should be made of good quality material with smooth finish (no sharp edges).
- It should be easy to use, space saving and there should not be any cable to change in design.
- The Product may be delivered in two or three Parcels for Heavy Products

### **13-Wrist Roll for children use:**

Unit should consist of double hand grips, rope and weight of minimum .5kg.

### **14-Grip Exercise: Grip exerciser tool for kids only.**

#### **15-Floor Ladder**

- It should be used for improvement of acceleration, lateral speed and change of direction
- It should be used for development of the core skills necessary to enhance balance, rhythm and body control
- The ladder should be of 15 feet long with 11 heavy-duty plastic rungs for high-intensity training
- The ladder should be made of thick, rugged, nylon straps and are sewn in place so that the rungs on the ladder don't move even when you bump into them repeatedly.
- The ends of the ladder should have strong double-reinforced D-rings to keep ladder staked and in place on grass surfaces.
- Includes carry bag for easy portability

#### **16-Wrist Circumductor**

- A iron wheel mounted on a laminated wooden base has a small Adjustable handle fitted to the wheel.
- A knob shall be provided at back of the wheel to control resistance 0 to maximum.
- Hollowed foam Padded platform fitted with two straps to hold arm and is fitted over the base in front of the wheel for wrist circumduction

## 17. Knee Hammer

### Use:

By practitioners to test deep tendon reflexes.

### Features:

- Easy to handle
- Long life
- Good grip

## 18-Depth perception peg board

It should be used for Stimulating the depth perception and eye-hand co-ordination on two levels.

Board is 30cm square and have 25 holes of 12mm dia.

The board comes with 21 solid of two colours of red and green pegs to place in. The top level of the peg should be clear made of transparent plastic and the base should be made of poly wood

## 19. Height Adjustable Walker & Rollator

- Approximate user height: 4'10"-6'1"
- Height adjustments: Seat height: 18"-22", Handles: 29.5"-38"
- Includes seamless padded seat and zippered carry pouch
- Loop-lock brakes
- Removable, hinged, padded backrest
- Ergonomic handgrips
- Weighs: 14 lbs.
- Weight capacity: 300 lbs.

## 22. Standing Frame

**Pediatric Standers, Standing Frames and Stand Systems** are utilized for children with developmental delays, disabilities and other physical challenges. Children, such as those with Cerebral Palsy, who are confined to wheelchairs or have compromised ambulation skills benefit significantly from standing devices. Standing technologies generally enable individuals by facilitating their ability to stand upright at various intervals throughout the day. Standing frames are used to improve circulation and studies have shown that the joint weight bearing achieved through standing improves bone density. Our standing systems are offered in a wide variety of designs, sizes and configurations to satisfy individual patient measurements and requirements.

## 20. Nirmals Hand table apparatus

Hard-wood table with laminated top is fitted with Pulleys, Leather loops, Nylon cord & Weights for Fingers, Hand, Wrist & Forearm exercises. Especially for Metacarpophalangeal / Interphalangeal joints. Also provided with Supinator / Pronator & Wrist-Circumduction wheel for Wrist exercises.

### TECHNICAL SPECIFICATION:

**Table:** Hard-wood table with laminated top

:Size; 24" x 30" x 30" high.

:Natural wood polish Finish.

**Pulleys:** 6 (Six) Nylon pulleys, fitted in Steel Frame with Powder coated finish.

:12 leather Loops with Nylon cord that passes through the Pulleys.

**Weight Hangers:** Six. Weight Hangers with Pulleys underneath the Table to hang weights.

**Weight:** Five sets, each set consists of 5 Sets weights of one each of 100, 200, 300, 400 and 500grams. Weights with a hole to hang, have Chrome finished.

**Finish:** Metal parts with Powder coating finish.

## 21. CP Chair

Appropriate use of an adaptive chair that enables a variety of seat and backrest angles as well as forward and backward tilt-in-space, along with appropriate accessory options, can effectively establish a stable pelvis and trunk for active core postural **control** for a child with cerebral palsy

### **25-Corner seat**

- Corner chairs assist with visual scanning, breathing, eating, and development of arm mobility; they are ideal for children who lack postural control of the head, neck, or trunk.
- The back of the chair is V-shaped rather than straight, and the seat can be lifted or lowered. A raised seat promotes thigh alignment, reducing both tightness in the hamstrings and spasticity in spinal and pelvic alignment.
- A lowered seat allows the child to relax with legs extended.
- Corner chairs shall have rectangular cushions that are placed between the distal femurs to ensure hip alignment. Provided with the seatbelt to prevent the child from sliding or pushing out of their chair.
- The dimension should be adequate for seating a child from 1-6 years of age.

### **27-Crawler:**

- Height adjustable type.
- The body should be supported by good quality Rexene to bear a child of age group 2-6 years.
- The unit should have powder coated frames with no sharp edges.
- It can provide hammock tilts forward or backward for correct positioning of the patient.

### **28-Staircase**

The stair case shall be a Small Up and Down type with 3 step UP and 3 step down. The patient can ascend and descend without turning.

The stairs are to be Small and straight.

The total length of the stair case should be fitted with two full width rails

It should bear a load capacity under normal for age group of 3-9 years.

Can be easily sited to any space.

Dimension:

For down two steps: 10"L x 30" W x 6" H

For UP Three steps : 10"L x 30" W x 4" H

The base platform: 24"L x 30"W x 12" H

Complete unit shall be made of good quality Poly Wood.

  
Chief District Medical & Public Health Officer  
Karnalika

**35-Beach ball : Regular playing beach ball for children size.**

Inflatable 12" in diameter .Rainbow desing.Made of non toxic ruber material .

## **26. Peanut Ball with different sizes**

The **sizes** of different sizes like 40cm, 50cm, 60cm, and 70 cm.

## **24. Electrical Stimulator**

To provide electrical stimulation. Is a type of physical therapy modality used to accomplish various tasks in physical therapy for rehabilitation.

  
Chief District Medical & Public Health Officer  
Keonjhar

## 29. Therapeutic Ultrasound Machine

### NAME AND CODING

#### GMDN name-Therapeutic Ultrasound Machine

Definition-Ultrasound is a method of stimulating the tissue beneath the skin's surface using very high frequency sound waves, between 800,000 Hz and 2,000,000 Hz, which cannot be heard by humans. Therapeutic ultrasound in physical therapy is alternating compression and rarefaction of sound waves with a frequency of >20,000 cycles/second

### GENERAL USE

**1.1-Clinical purpose** For treatment of painful conditions involving the musculoskeletal and neuromuscular structures

**1.2-Used by clinical department/ward**-It is used in physiotherapy,neurology,trauma care .

**1.4-Overview of functional requirements-**

### TECHNICAL

#### 2-TECHNICAL CHARACTERISTICS

- It should be double frequency ultrasound machine.
- Modes of operation should be in continuous and pulsed
- It should have at least in 4 different settings for Pulse ratio.
- Maximum output 2.5-3 watts/Sq.cm.
- Output frequency 1 MHz and 3MHz
- Treatment time should be adjustable from 0-99 minutes
- Automatic alarm should be their on completion of the treatment.
- Digital LCD display to indicate the output in w/cm<sup>2</sup> and other required services.
- .All settings should be provided using keys/touch panel.
- Both the transducer should be high quality water resistant (minimum IPX 5)
- The beam type :Divergent/Collimated
- Transducer :The Effective radiating area should be of 0.5 to0.8 for 1MHz and 0.4 to 0.6 for 3MHz.
- The BNR for both the transducer should be 4-6.

**2.2-Settings**-Treatment time,frequency selection,pulse ratio etc.

**2.3-User's interface**-manual

**2.4-Software and/or standard of communication(whenever required)**-inbuilt.

#### 3-PHYSICAL CHARACTERISTICS

**3.1-Dimensions (metric)**-Stand alone

**3.2-Weight (lbs, kg)**-<5kg

**3.3-Configuration**-NA

**3.4-Noise (in dBA), heat dissipation**-NA

**3.5-Mobility, portability**-Table top

Chief Director, Maharashtra State Health Services, Mumbai  
18/05/2018

- 4-ENERGY SOURCE (electricity, UPS)
- 4.1-Power Requirements-NA
- 4.2-Battery operated-NA
- 4.3-Tolerance (to variations, shutdowns)-NA
- 4.4-Protection-NA
- 4.5-Power consumption-NA
- 4.6-Other energy supplies-NA
- 5-ACCESSORIES, SPARE PARTS, CONSUMABLES
- 5.1-Accessories (mandatory, standard, optional)-
- 5.2-Spare parts (main ones)-
- 5.3-Consumables / reagents (open, closed system)-

#### 6-ENVIRONMENTAL AND DEPARTMENTAL CONSIDERATIONS

- 6.1-Atmosphere / Ambiance (air conditioning, humidity, dust ...)-  
Operating condition: Capable of operating continuously in ambient temperature of 0 to 50 deg C and relative humidity of 15 to 90% in ideal circumstances. an ambient air velocity is less than 0.3 m/s.
- 6.2-User's care, Cleaning, Disinfection & Sterility issues-Complete unit to be easily washable and sterilizable using both alcohol and chlorine agents.

#### 7-STANDARDS AND SAFETY

- 7.1-Certificates (pre-market, sanitary, ..);Performance and safety standards (specific to the device type); Local and/or international
  - ISO 13485;Manufacturer / supplier should have ISO certificate for quality standard. Should be USFDA / CE(notified) approved product or BIS certified
  - Safty standard to meet IEC 60601

#### 8-TRAINING AND INSTALLATION

- 8.1-Pre-installation requirements: nature, values, quality, tolerance-Supplier to perform installation, safety and operation checks before handover.
- 8.2-Requirements for sign-off-Certificate of Calibration and inspection from the factory.
- 8.3-Training of staff (medical, paramedical, technicians)-Training of users in operation and basic maintenance shall be provided

#### 9-WARRANTY AND MAINTENANCE

- 9.1-Warranty-1 year.
- 9.2-Maintenance tasks-maintainance manual detailing complete maintaining schedule
- 9.3-Service contract clauses, including prices-
- 9.4-Others-

#### 10-DOCUMENTATION

- 10.1-Operating manuals, service manuals, other manuals-Required
- 10.2-Other accompanying documents-Demonstration CDs
- 10.3-Recommendations for maintenance-NA

#### 11-NOTES

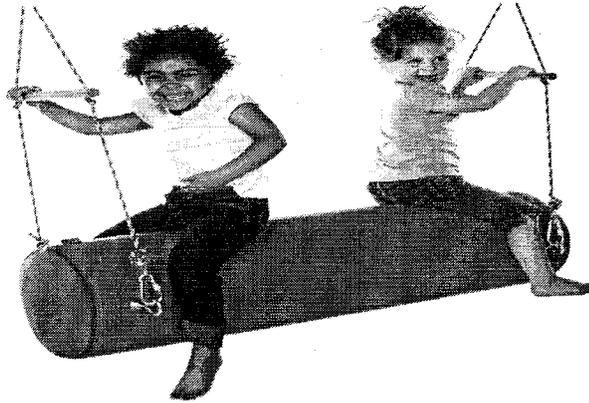

- 11.1-Service Support Contact details (Hierchy Wise; including a toll free/landline number)-NA
- 11.2-Recommendations or warnings-NA

**N.B.-** There are few items having no technical specification (prototype specified)

## Annexure- C

1. **Bolster Swing** :- for vestibular stimulation: (Approximate cost Rs.5000/- per unit).

|   |                           |   |
|---|---------------------------|---|
| 1 | Clinical Purpose          | Bolster swings are for sensory integration therapy as they encourage righting reactions, adjustments to linear acceleration and motor planning. |
| 2 | Technical Characteristics | Should have vinyl-covered base on-either side by simply flipping the bolster over;  |
|   |                           | Should have one side is high-density foam padding; the other side is padded with low-density foam;  |
|   |                           | Should have-min 4 feet in length and max 1 feet in diameter;  |
|   |                           | Should have max load 180Kgs;  |

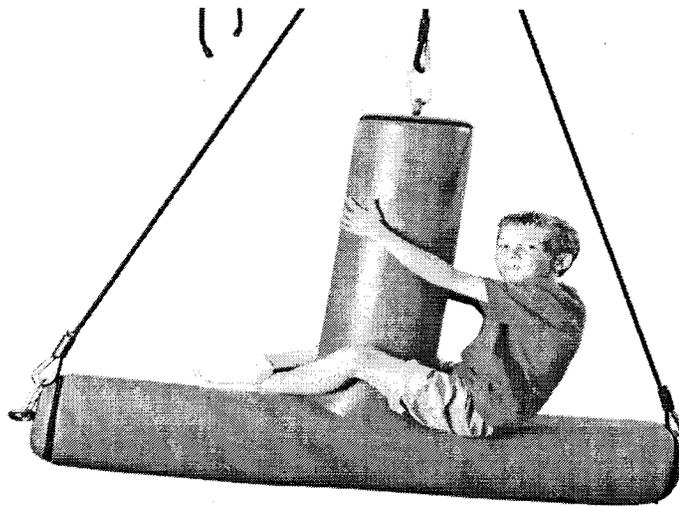

2. **Tyre Tube Swing** :- for vestibular stimulation : (Approximate cost – Rs.4000/- per both tyre & tube swings)

|   |                           |  |
|---|---------------------------|--|
| 1 | Clinical Purpose          | Tyre tube swings are for sensory integration therapy as they encourage righting reactions, adjustments to linear acceleration and motor planning |
| 2 | Technical Characteristics | Should have dual axis hanging feature;   |
|   |                           | Should provide inflating pump with measuring gauge. The air nozzle should be on the outer side of the tube for safety from injury;               |
|   |                           | Should have max load 180Kgs;   |

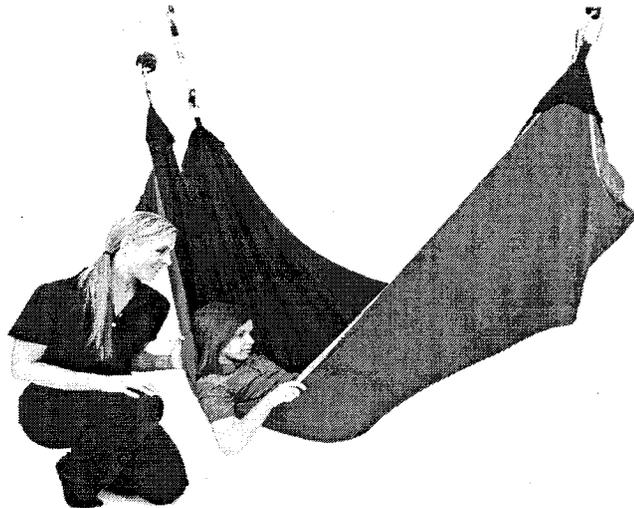

|  |   |
|--|---|
|  | Should have heavy duty hanger with ball bearing to support up to 60 min continuous swing; |
|--|---|

3. **T Swing:-** for vestibular stimulation : (Approximate cost – Rs.5000 per unit)

|   |                           |  |
|---|---------------------------|--|
| 1 | Technical Characteristics | Weight: .....241 lbs (110 kg) Age Group: .....2-5 Years Length: .....10'-07" (3,23 m) Use Zone L: .....23'-00" (7,01 m) Width: .....6'-00" (1,83 m) Use Zone W: .....20'-00" (6,10 m) Height: .....7'-00" (2,13 m) Number of Users: .....2 |
|---|---------------------------|--|

4. **Lycra Swing and hammocks:-** for vestibular stimulation : (Approximate cost – Rs.6000/- per unit)

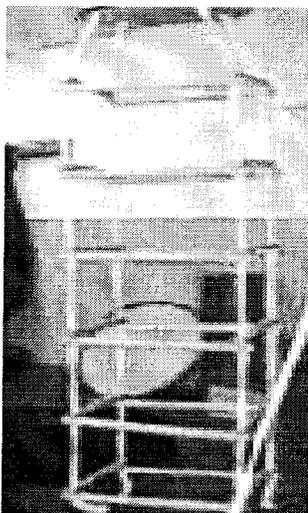

|   |                           |   |
|---|---------------------------|---|
| 1 | Technical Characteristics | Description: Heavy lycra hammock for kids<br>Material- Lycra<br>Prod Size- 180*150 CM<br>Measure- 37*37*24 Cm |
|---|---------------------------|---|

*Smr*  
Chief District Medical & Public Health Officer  
Ksonjhar

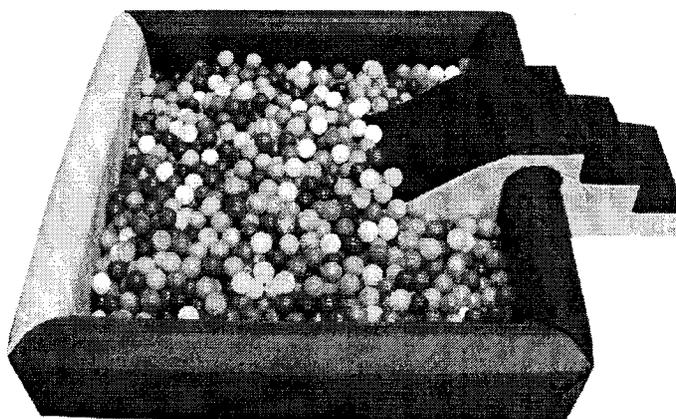

|  |   |
|--|---|
|  | Packing-1 pcs/ inner carton ,2 pcs / carton<br>Colour- Multi Colour |
|--|---|

5. **Rope Ladder Swing:- for vestibular stimulation : (Approximate cost – Rs.5000/- per unit)**

|   |                           |   |
|---|---------------------------|---|
| 1 | Clinical Purpose          | Provide Little acrobats can train their balance strength and power  |
| 2 | Technical Characteristics | Should have a wooden bar that can be used as seat or gymnastic bar  |
|   |                           | Should have sturdy synthetic rings which give a strong hold to little hands while exercising and the synthetic rope can securely be affixed with the metal rings. |
|   |                           | Should have max 200cm in length   |
|   |                           | Should have min load capacity 60Kg  |
|   |                           | Should have heavy duty hanger with ball bearing to support up to 60 min continuous swing;   |
|   |                           | Age 3+  |

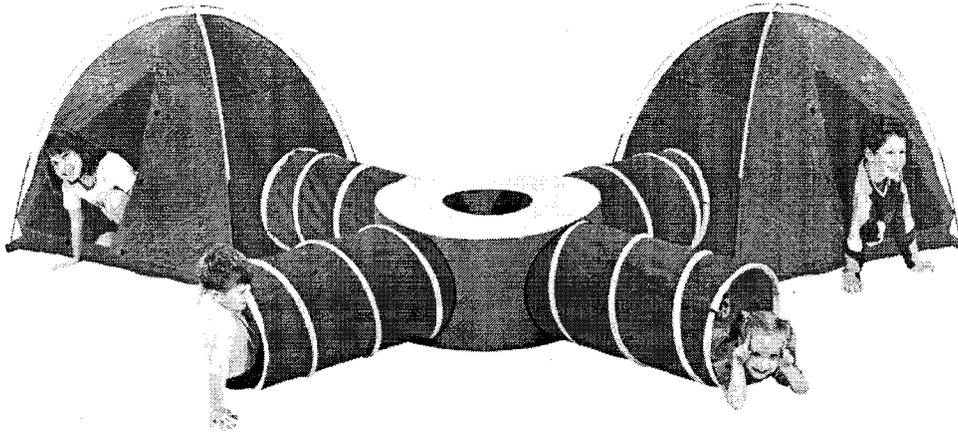

6. **Ball Pool with multi colour small ball:- for tactile stimulation : (Approximate cost – Rs.15000/- per set)**

|   |                  |  |
|---|------------------|--|
| 1 | Clinical Purpose | Provide multi sensory tactile simulation as preschoolers balance, adjust and move through them |
| 2 | Technical        | Should have vinyl covered bas  |

|                 |   |
|-----------------|---|
| Characteristics | Should have one side is high density foam padding; the other side is padded with low density foam |
|                 | Should have inner measurement min. 5 feet in length and 5 feet in width                           |
|                 | Should have min. 750 multicolor soft plastic material balls                                       |
|                 | Should have 4 in thick foam walls 2 feet height   |

**7. Tunnel for tactile stimulation: for tactile stimulation : (Approximate cost – Rs.12000/- per set)**

|   |                           |  |
|---|---------------------------|--|
| 1 | Clinical Purpose          | Stimulate the imagination for creative playtime.   |
| 2 | Technical Characteristics | Should have durable polyester fabric in bright colors;   |
|   |                           | Should have one side is high-density foam padding; the other side is padded with low-density foam;     |
|   |                           | Should be min. 8 feet in length and 1.5 feet diameter which provides space for easy crawl through fun; |
|   |                           | Play Tunnel can attach to other Play hut play structures creating additional play pattern options;     |
|   |                           | Should have light weight and portable;   |
|   |                           | Should have 4 in.thik foam walls in circular pattern;  |

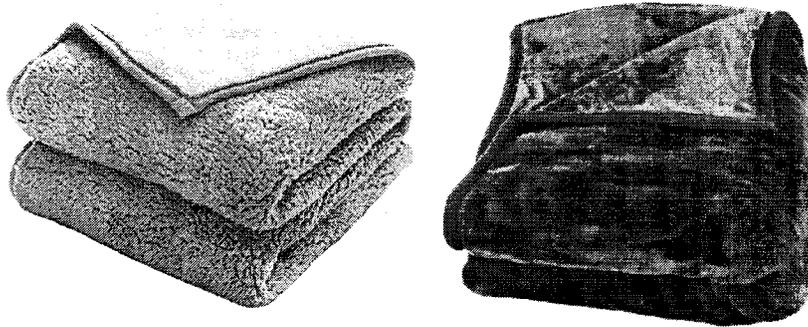

**8. Bean Bags:- for tactile stimulation (Approximate cost – Rs.8000/- for two bean bags)**

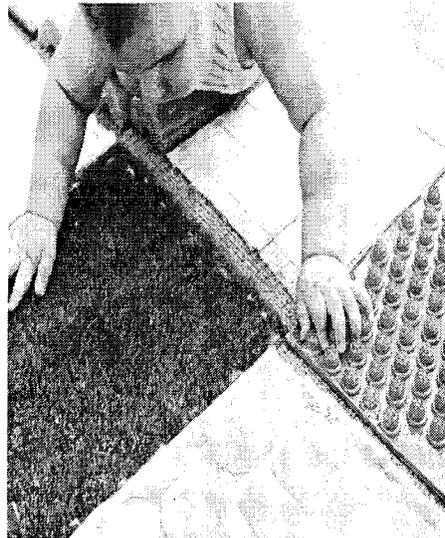

|   |                  |   |
|---|------------------|---|
| 1 | Clinical Purpose | For seating purpose                                     |
| 2 | Technical        | Should be filled with fire retardant polystyrene beads; |

|                 |  |
|-----------------|--|
| Characteristics | Should have durable material in bright colors;                                   |
|                 | Should have measurements; 60cm x 60cm x 60cm, Bean Refill volume 2.5 cubic feet; |
|                 | Should be light weight and portable;   |

9. Wrapping in blankets, weighted blankets, towels:- for neutral warmth:

10. Sandwich activities : between mats, pillow, bean bags:- for tactile stimulation

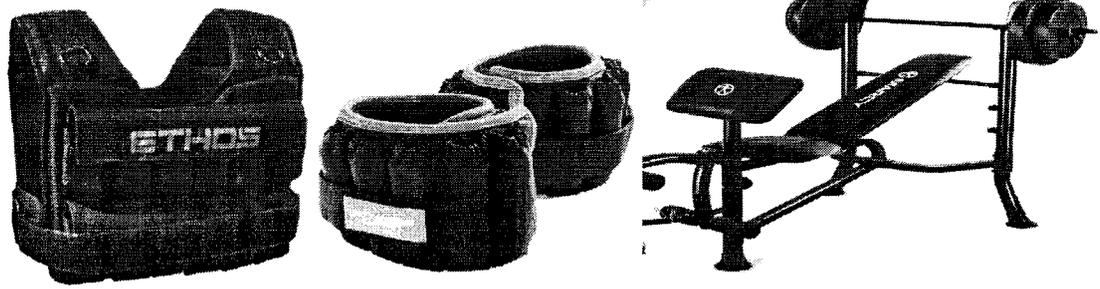

and

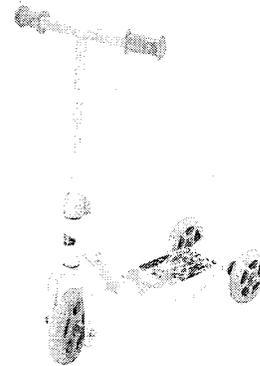

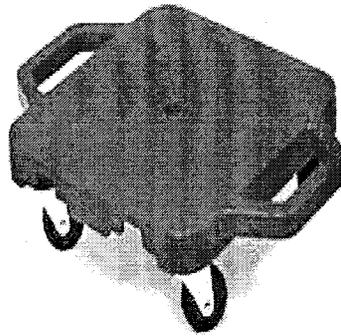

11. Activities for Exploring : with sand, rice, beans and other textures:- for tactile textures (Approximate cost Rs.12000/- per set)

  
 Chief District Medical & Public Health Officer  
 Keonjhar

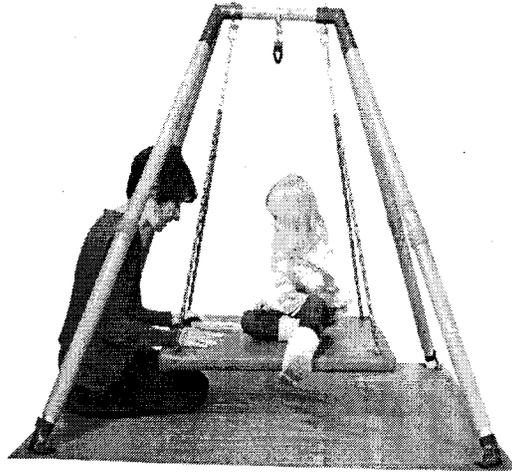

**13. Scooter board:- for Vestibular stimulation : (Approximate cost – Rs.6000/- per set)**

|   |                           |   |
|---|---------------------------|---|
| 1 | Technical Characteristics | The scooter board should be used for the age from 3-6 years. It can be used by the kids who can travel every way while working on gross motor skills development, increasing arm strength and motor planning. The scooter board can be used in a sitting, kneeling and prone position for development of gross motor skill of upper and lower extremities. It should be made of heavy duty polypropylene of minimum 5-year guarantee of 16" base platform. It should be provided with safety grip handles and non marring rubber swivel casters. Minimum weight bearing capacity should be 50 kg. |
|---|---------------------------|---|

**14. Balance Bean:- for vestibular stimulation : (Approximate cost – Rs.8000/- per set)**

  
 Chief District Medical & Public Health Officer  
 Kachin

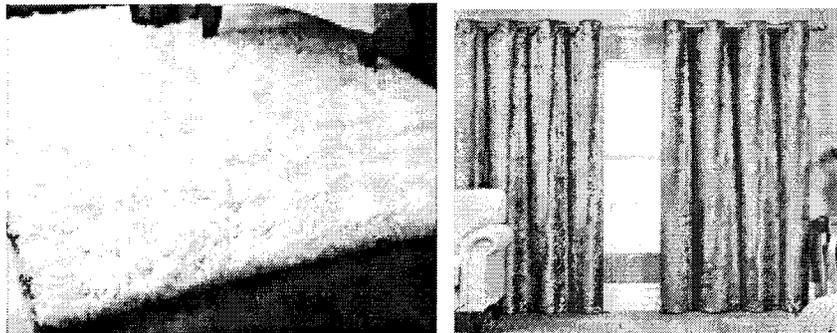

**15. Thera Band for vestibular stimulation : (Approximate costt – Rs.2000/- per set)**

|   |                           |  |
|---|---------------------------|--|
| 1 | Technical Characteristics | A Complete System of Progressive Resistive ExerciseThera-Band Resistive Exercise Systems Include: Latex Bands available in 8 colour-coded levels of resistance Natural Rubber Tubing available in 7 colour-coded levels of resistance Handles for a more secure grip Features: Proper use of these systems for resistive exercise provides both positive and negative force on the muscles, improving strength, range of motion and cooperation of muscle groups. Colour-coded progressive resistance gives at-a-glance documentation of progress from one level to the next |
|---|---------------------------|--|

**16. Soft Blankets:- for tactile textures :**

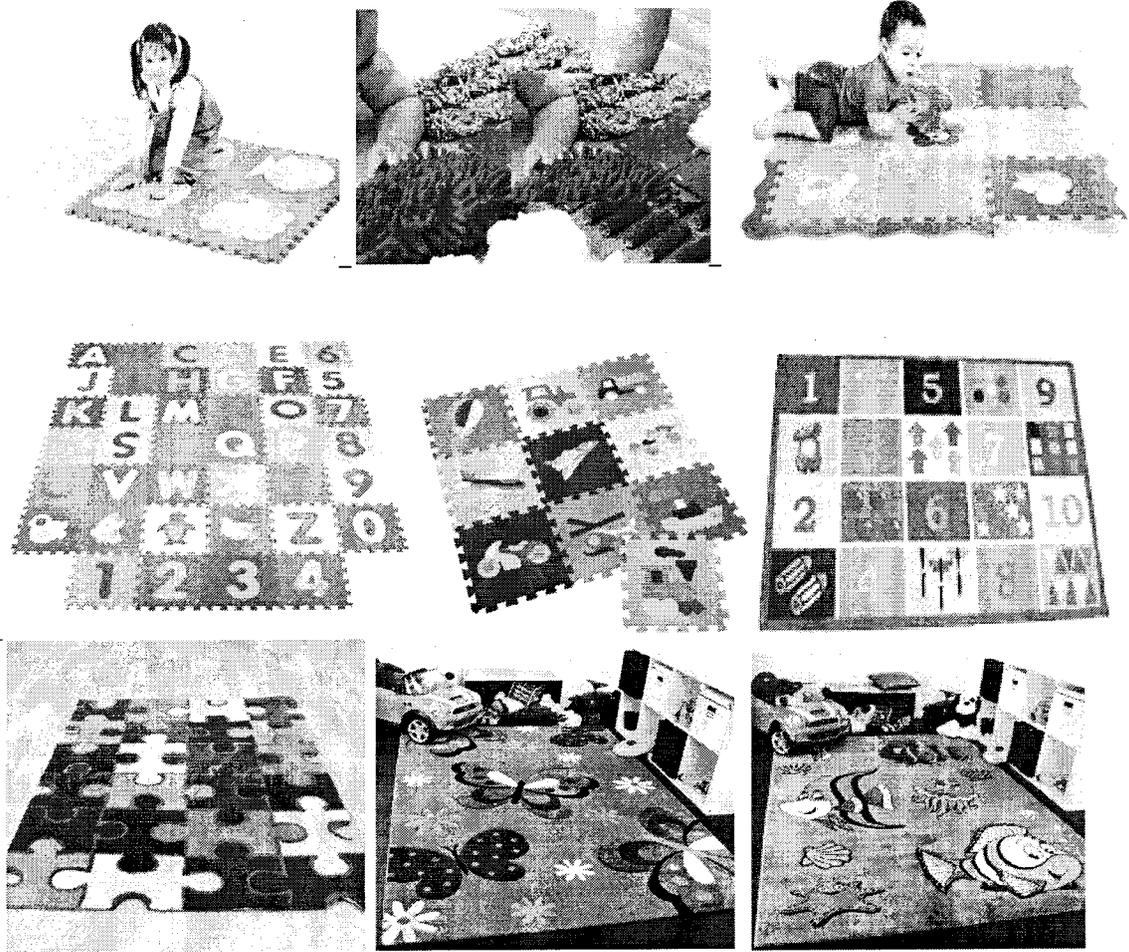

**17. Soft mattress for completely covering the floor and Curtains:- for tactile textures:**

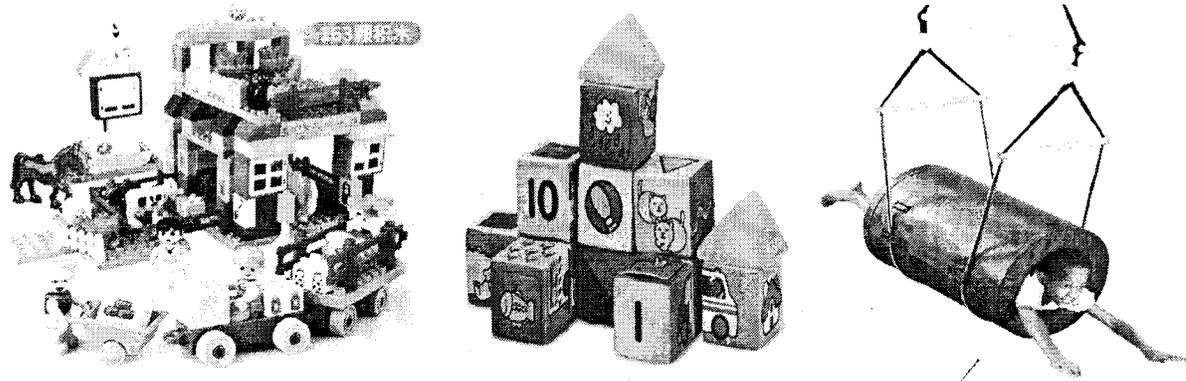

*Smj*  
Chief District Medical & Public Health Officer

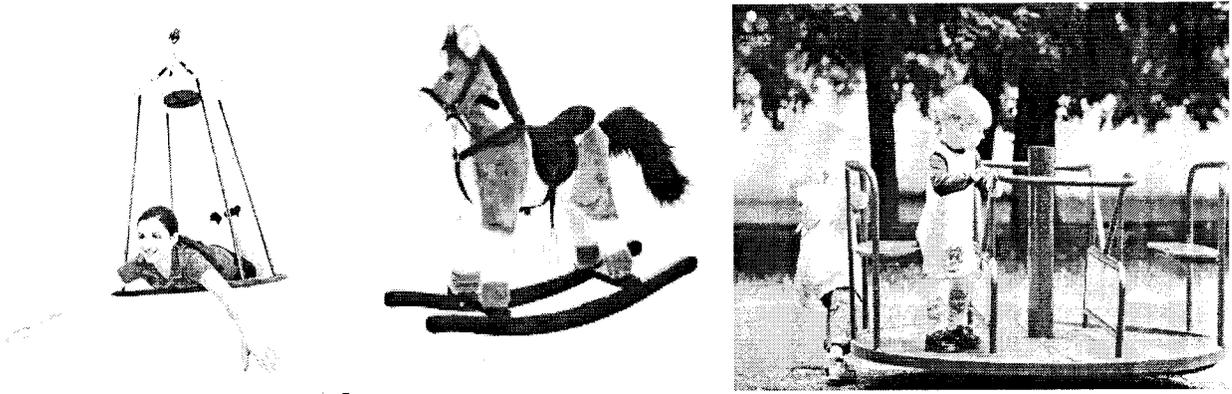

**18. Sensory mats different textures (soft, rough):- for tactile textures - (Approximate cost – Rs.10000/- per set)**

**19. Blocks, bolsters, samll chairs:- for Vestibular stimulation - (Approximate cost – Rs.15000/- per set)**

*[Signature]*  
 Chief District Medical & Public Health Officer  
 Keonjhar

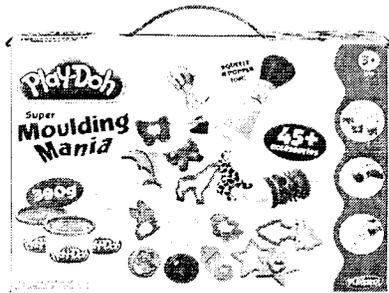

20. **Tactile Brushes:-** for tactile textures – (Approximate cost – Rs.5000/ per set)

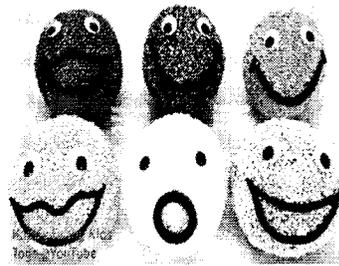

21. **Playdoh, funny foam, textured balls, tactile walls, boards and books, textured puzzles, finger paints (regular or using pudding), using various materials (satin, carpet swatches, silk, lambs wool, washcloths, cotton) and massagers, vibrating toys:-** for tactile stimulation : (Approximate cost – Rs.28000/- per set)

22. Chart paper, pencil, gum, crayon, gripper, eraser, scissor, note books:- for Proprioceptors

23. Form board (Alphabets, numbers, colours, shapes, body parts, size, flash cards (animals and fruits):- for Tactile Textures

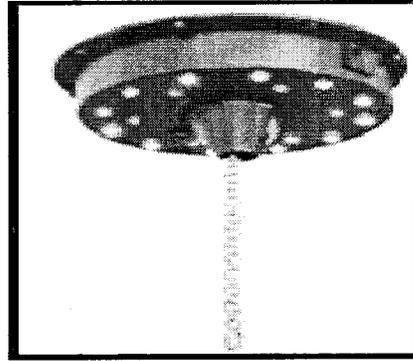

24. Beads with lace, ring stand, button and UN button shirts, shoe lacing board, toys:- for Tactile Stimulation :

25. LED mirror ball, pin spot and mirror ball, mirror ball motor-mains, fire ball, sound activated light, Bubble tube (with LED light and vibrator) and speakers connected

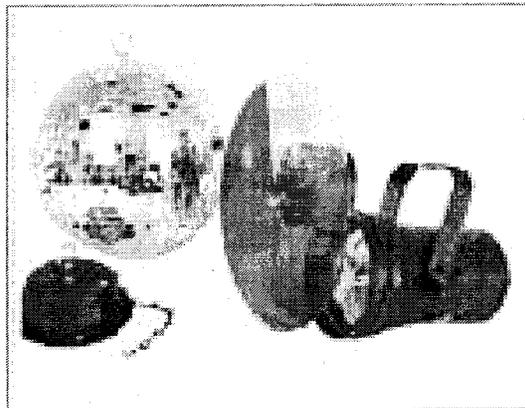

to the sound player (pre recorded sound of water fall; wind chimes, birds sounds and soft instrumental music):- for visual stimulation- (Approximate cost- Rs.50000/- per set)

**25 (i) LED Mirror Ball :**

|   |                           |   |
|---|---------------------------|---|
| 1 | Clinical Purpose          | LED Mirror Ball features a 6 inches diameter ball covered with crack resistant mirror tiles, a battery/mains operated rotating motor with a silver chain and multi colored LED lights mounted in the motor. |
| 2 | Technical Characteristics | 6inches diameter disco mirror ball  |
|   |                           | Rotating motor with LED lights  |
|   |                           | Attached silver chain and ring  |
|   |                           | On/Off switch and sound activation  |

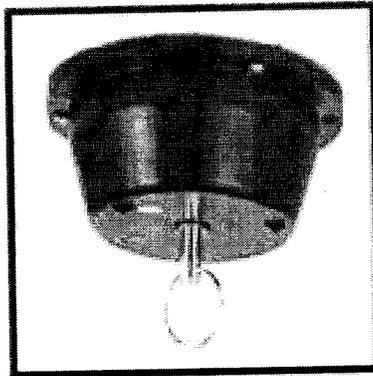

**25 (ii) Pin spot and Mirror Ball :**

|   |                           |  |
|---|---------------------------|--|
| 1 | Clinical Purpose          | Shine the pin spot onto the mirror ball to create hundreds of mirrored reflections around the room             |
| 2 | Technical Characteristics | mains powered motor to spin mirror balls or other light hanging items;   |
|   |                           | Fixed 2 RPM notational speed;  |
|   |                           | Designed to use power from lighting circuit;   |
|   |                           | Shaft with pre-drilled hole for mirror ball connection;  |
|   |                           | Load limit of 4kg at mirror ball motor;  |
|   |                           | Should operate on 220VAC/50Hz;   |
|   |                           | Should be provided with 20cm ball and 15 cm chain with safety ring to prevent detachment of the rotating ball; |
|   |                           | Pinspot should have 4 different color wheel;   |

**25 (iii) Mirror Ball Motor-Mains :**

|   |                           |  |
|---|---------------------------|--|
| 1 | Clinical Purpose          | This ceiling mounting box contains a motor that will rotate mirror ball at a stately 2 RPM, Fitted with 1m (approx.) mains lead and plug.  |
| 2 | Technical Characteristics | Mains powered motor to spin mirror balls or other light hanging items;<br>fixed 2 RPM rotational speed;<br>Designed to use power from a lighting circuit;<br>Load limit of 4kg at mirror ball motor;<br>Shaft with pre-drilled hole for mirror ball connection;<br>Should operate at 220VAC/50Hz |

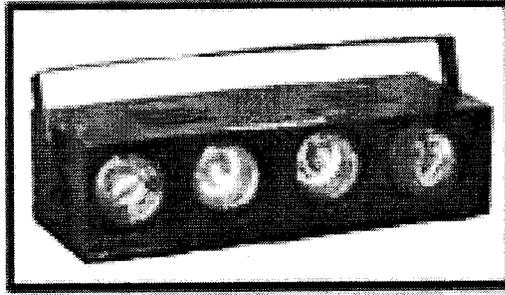

**25 (iv) Fire Ball :**

|   |                           |   |
|---|---------------------------|---|
| 1 | Clinical Purpose          | This classic light effect fires narrow beams of light around the room as it rotates.  |
| 2 | Technical Characteristics | Should have wide coverage;<br>Perfect for ceiling or desk mounting;<br>Should have 100,000 hours LED life span (approx.);<br>Should operate at 220VAC/50Hz<br>Should have min 4 revolutions per minute;<br>Should have max weight 2Kg |

**25 (v) Sound activated light :**

|  |                           |  |
|--|---------------------------|--|
| 1  | Clinical Purpose          | This classic light effect multicolor light around the room |
| 2  | Technical Characteristics | Should have sound activation system inbuilt;               |
|  |                           | Fully Automatic LED Compact Border;                        |
|  |                           | Cycle Light for indoor use                                 |
|  |                           | Lightweight;   |
|  |                           | Adjusting speed and sound sensitivity;                     |
|  |                           | Should have low power consumption;                         |
|  |                           | Should operate at 220VAC/50Hz                              |
| Should have 100,000 hours LED life span (approx.); |                           |  |

**25 (vi) Bubble tube (with LED light and vibrator) :**

|   |   |  |
|---|---|--|
| 1 | Clinical Purpose  | The light change in tube while touching around the light                                       |
| 2 | Technical Characteristics (Bubble Tube with LED Light and vibrator) | Adjusting speed and sound sensitivity;   |
|   |   | Should have low power consumption;   |
|   |   | Should operate at 220VAC/50Hz  |
|   |   | Tubes should made of thick acrylic plastic, not glass;   |
|   |   | The LED light of Bubble tube should slowly change color wilst small bubbles rise continuously; |
|   |   | Should have min 10,000 hours LED life span (approx.);  |
|   |   | Minimum Dimensions: 75mm diameter x 500mm height;  |
